

Technical and Professional Summer Internships

at Oak Ridge National Laboratory

Looking for an internship that can open a world of opportunities?

The Oak Ridge National Laboratory (ORNL) **Technical and Professional Internships Program** provides opportunities for undergraduate and graduate students to gain experience in information technology, facilities and operations, human resources, legal counsel, communications, finance, health services, and other technical and professional fields.

As the largest US Department of Energy (DOE) science and energy laboratory, ORNL is a great place to learn about the technical and professional systems that support a DOE laboratory every day. Engage with ORNL projects, connect with ORNL staff, and join student activities during this full-time internship experience.

ORNL's World-Leading Capabilities

DIVERSE RESEARCH AREAS

- Biological and environmental sciences
- Clean energy technologies
- Nuclear fusion and fission
- Isotope research and development
- Materials science
- National security
- Neutron science
- Supercomputing and computational science

WORLD-CLASS FACILITIES

- Spallation Neutron Source
- High Flux Isotope Reactor
- Oak Ridge Leadership Computing Facility
- Manufacturing Demonstration Facility
- Center for Nanophase Materials Sciences
- Building Technologies Research and Integration Center
- National Transportation Research Center

Benefits

- Biweekly stipend based on educational level

Eligibility

- Current associate's, bachelor's, master's, or doctoral student
- Currently enrolled in a degree-seeking program at a regionally accredited US college or university at time of application and continuing into the upcoming semester
- Have a cumulative GPA of 3.0 or higher on a 4.0 scale
- 16 years of age or older
- Available for full-time work

Other relevant qualifications will depend on the specific project of interest.

Undergraduate Research Summer Internships

at Oak Ridge National Laboratory

Looking for a research experience that can open a world of opportunities?

The **Undergraduate Research Summer Internship (URSI)** Program at Oak Ridge National Laboratory (ORNL) complements academic programs, offering unique resources and mentorship from ORNL scientists to enhance science, technology, engineering, and math education; encourage careers in science and technology; and improve scientific literacy.

This 10-week summer program for current associates and bachelor's students will advance your scientific skills and knowledge in areas of critical national need. As an URSI intern, you will engage in rewarding research opportunities, connect with world-class scientists, have opportunities to share and exchange innovative ideas and techniques, and enjoy enrichment activities with other undergraduate interns.

ORNL's World-Leading Capabilities

DIVERSE RESEARCH AREAS

- Biological and environmental sciences
- Clean energy technologies
- Nuclear fusion and fission
- Isotope research and development
- Materials science
- National security
- Neutron science
- Supercomputing and computational science

WORLD-CLASS FACILITIES

- Spallation Neutron Source
- High Flux Isotope Reactor
- Oak Ridge Leadership Computing Facility
- Manufacturing Demonstration Facility
- Center for Nanophase Materials Sciences
- Building Technologies Research and Integration Center
- National Transportation Research Center

Benefits

- Biweekly stipend
- Dislocation allowance
- Collaborations with leading scientists
- Virtual access to world-class user facilities and labs

Eligibility

- Current associate's or bachelor's student
- Currently enrolled in a degree-seeking program at a regionally accredited US college or university at time of application and continuing into the upcoming semester
- Have a cumulative GPA of 3.0 or higher on a 4.0 scale
- 16 years of age or older
- Available for full-time work

The URSI program does not have citizenship requirements, although specific research projects may have additional restrictions.
